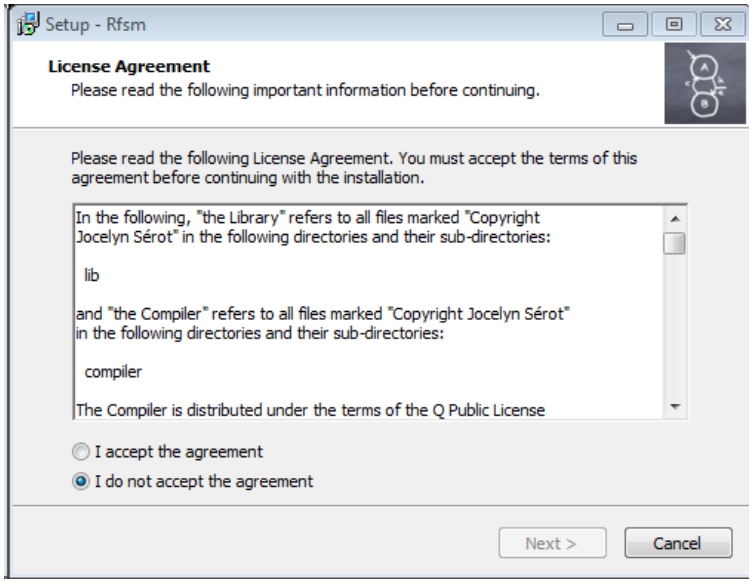
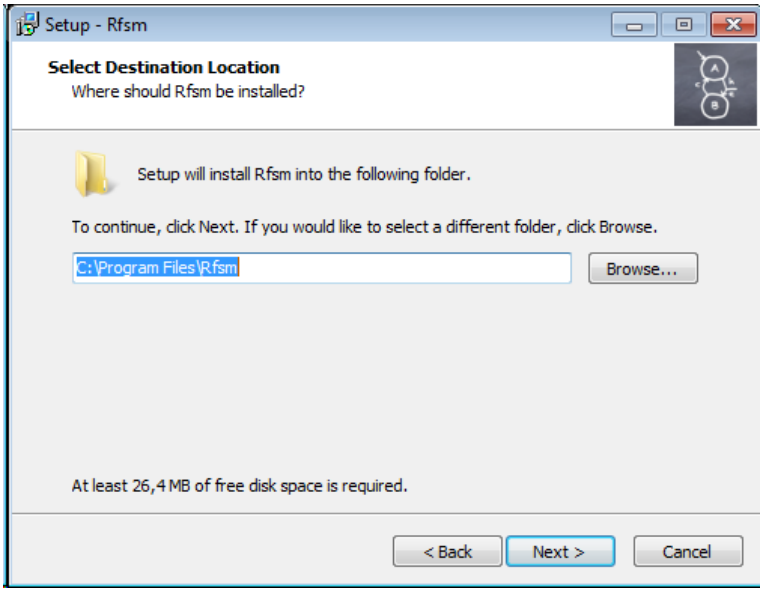
RFSM INSTALLER GUIDE
v1.0 - Feb 2018
J. Sérot (jocelyn.serot@uca.fr)

STEP 1 - Click on the self-installer icon

STEP 2 - Read and accept licence agreement

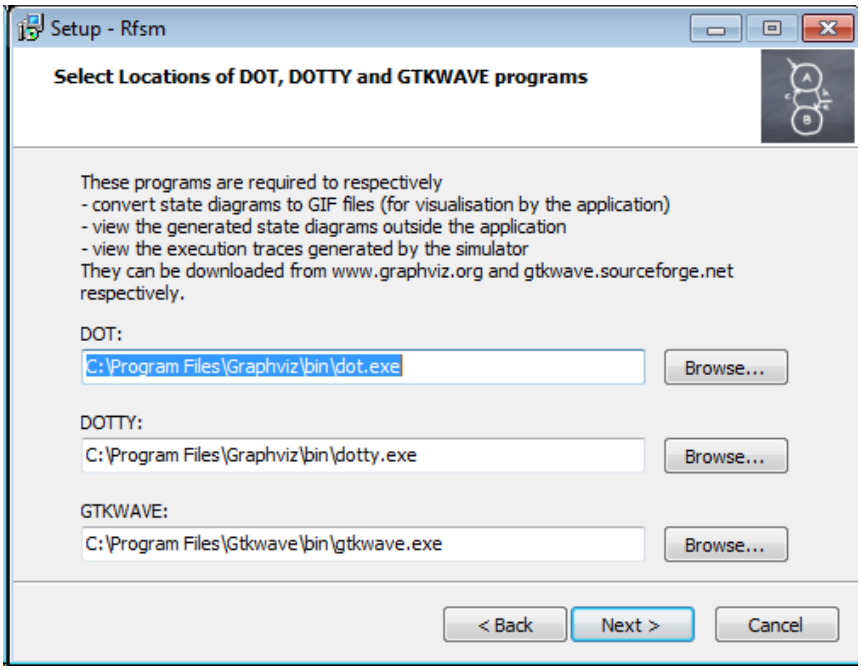


STEP 3 - Select installation directory



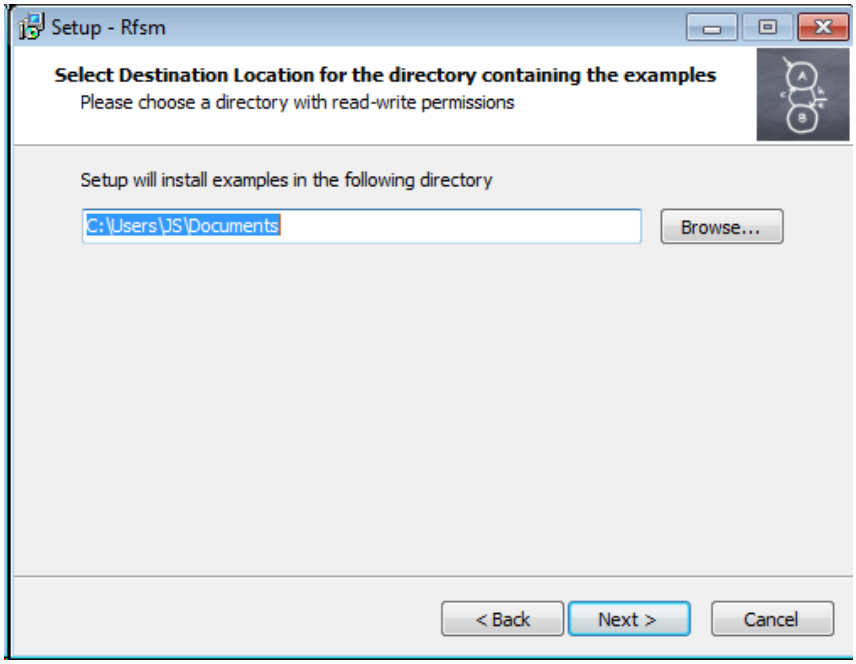
STEP 4 - Specify programs to use for viewing state diagrams and simulation result

Note : these programs must be present on your computer. If not, you can proceed but Rfsm won't be able to display the generated state diagrams graphs and simulation results. Links for downloading such programs are indicated in the wizard window.

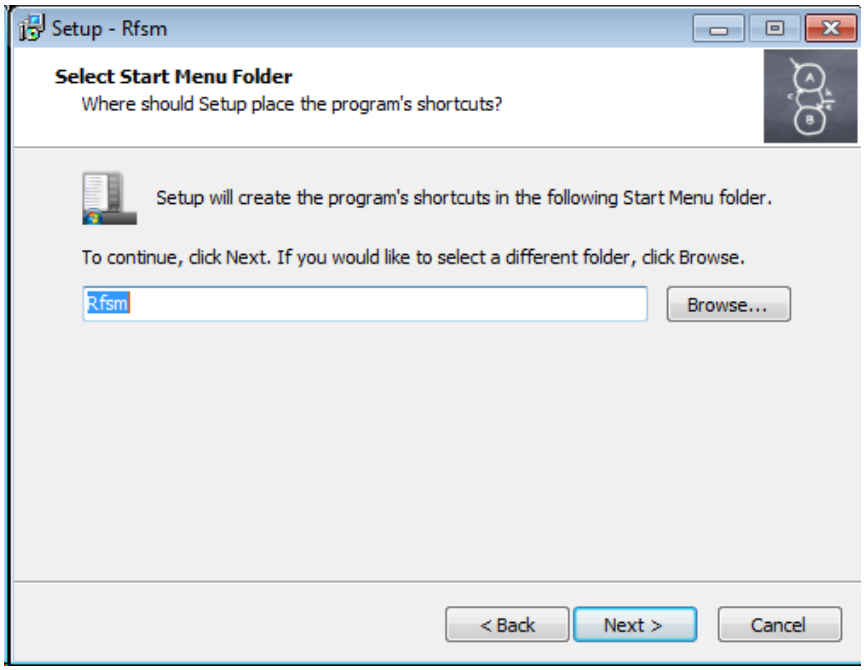


STEP 5 - Select directory for installing examples

Note : it is not recommanded to install the examples in the same directory as the program. Be careful to choose a location where you have read and write permissions

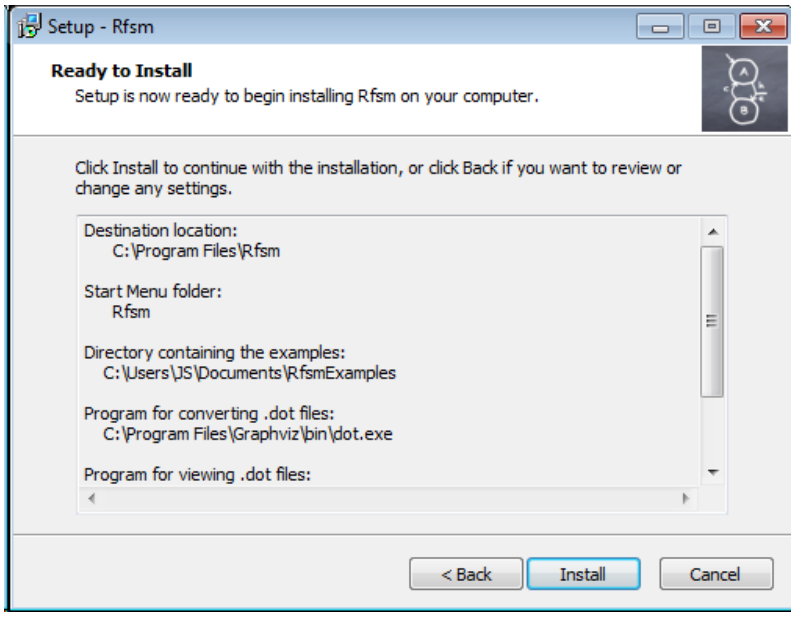


STEP 6 - Specify shorcut to use for launching Rfsm application



STEP 7 - Ready to install

Check all items and click Install button. This will
- create an install directory at the specified location (here : C:\Program Files\Rfsm)
- create and copy the examples at the other specified location (here : C:\Users\JS\Documents \RfsmExamples)
- create an .ini file for the application remembering these settings



At the end of the install, you'll have to possibility to view the QuickStart guide and/or starting the application
